Overview

Help your customers stay ahead of viruses and spyware with powerful protection against online threats.

A leader in both protection and performance, Norton™ AntiVirus identifies and stops new threats faster than less sophisticated security software.

Five unique layers of smart protection stop viruses and spyware in their tracks. And it all happens with fast scan speeds with the least impact on your customers' PC performance, so it won't disrupt their work or play.

Benefits

Norton™ AntiVirus helps you to protect your customers and:

Eliminates viruses and spyware with powerful protection

- Delivers proactive protection that stops online threats before they can infect your customers' computers.
- Five different layers of smart protection detect and eliminate threats so they can rest easy knowing they're protected.
- Identifies and stops new threats fast.

Helps your customers to stay protected without interruptions or slowdowns

- Superior performance and blazing fast scan speeds protect them without slowing down their computer.

- Runs in the background, so it won't disrupt their work or play.
- Won't swallow up their computer's memory and hard disk space.

Keeps your customers' PC running fast

- Installs in a flash, with a single mouse click.
- Proactively tells them if files and applications are safe, or may slow down or crash their computer.
- Improved customizable Control Center now lets them choose between a simple or detailed view for accessing program controls and Web-based Norton services.
- Cloud-based Norton Management puts you in complete control and simplifies protecting your various devices.
- Lets you fix, update, renew, and install Norton AntiVirus on additional PCs over the Internet with a few simple clicks.
- Brings together your other Norton protection products in one convenient place.
- Always Up-To-Date Product Version: Norton automatically sends you important product and feature updates throughout the year. The latest version installs without you needing to do anything.
