Overview

Stop viruses, spyware, online identity theft, and more with the powerful protection of Norton™ Internet Security.

Able to quickly detect and eliminate online threats, Norton Internet Security uses four unique layers of protection to prevent threats from ever reaching your customers' computers, without slowing them down. Plus it gives your clients easy access to Norton Online Family so they can protect their kids from online dangers.

The result? Superior protection with fast scan speeds and low impact on your customers' PC's performance. So they can surf, shop, bank, and socialise online safely, without annoying slowdowns or interruptions.

Benefits

With Norton™ Internet Security, you can protect your customers and:

Stop viruses, spyware, and online identity theft with the industry's most powerful virus protection

- Offers advanced protection from online threats.
- Five different layers of smart protection proactively detect and eliminate threats before they reach your customers' computers.
- Identifies and stops new threats faster than other less sophisticated security software.

Enable your customers to browse, shop, bank and socialise online without worry

- Scans email and instant messages for viruses, suspicious links, infected attachments and other dangers before your clients open them.
- Identifies safe websites, proactively blocks unsafe sites and stops online threats before their browser even loads.
- Prevents cybercriminals from hacking into your customers' PCs and swiping their information when they use wireless networks.

Help your customers to enjoy their favorite online activities safely, without annoying slowdowns or disruptions

- Runs in the background, so it won't interrupt their work or play.
- Won't swallow up their computer's memory and hard disk space.

Help protect your customers' kids from Internet dangers with Norton Online Family

- Parental Controls Management lets them easily connect to Norton Online Family right from within the Norton Control Center.
- Lets them know what their kids are up to online by tracking which websites they visit, and allows your customers to block inappropriate sites.
- Keeps an eye on their kids' social network activities and who they're chatting with online, so your clients can spot potential dangers.

Keep your customers' PC running fast

- Installs in less than a minute with a single mouse click.
- Proactively tells your customers if files and applications are safe or may slow down or crash their computer.
- Improved customizable Control Center now lets them choose between a simple or a detailed view for accessing program controls and Web-based Norton services.

Cloud-based Norton Management puts your customers in complete control and simplifies protecting their various devices

- Lets them fix, update, renew, or install Norton products on additional PCs without needing to track down their product key or their install CD.
- Works from anywhere over the Internet, with a few simple clicks.
- Brings together their other Norton protection products in one convenient location.
- Always Up-To-Date Product Version: Norton automatically sends you important product and feature updates throughout the year. The latest version installs without you needing to do anything.
