

HIGHLIGHTS AT ELYTIS

Elytis' Q1-Q2 financial performance surpasses goals

Our company's latest results show a very good performance for the first half of the financial year (July-December 2023) with figures that are not only growing healthily year over year but also above budgeted expectations. "We are reaping the fruits of the diversification of our offering combined with our regional expansion in Africa, our staff's dedication and the trust of all our partners" says Vincent Bourelly, Elytis' Chief Operating Officer.

OUR EVENTS

Elytis' co-hosts MBCOM Regional Summit 2024

Elytis was a co-organiser and partner of the MBCOM Regional Summit 2024 that took place at InterContinental Resort Mauritius on 21 February. The event hosted by MBCOM Technologies, Broadcom and our company, attracted 140 industry leaders, channel partners, clients and keynote speakers. The Honourable Deepak Balgobin, the Mauritian minister of IT, Communication and Innovation, was also present.

It was an opportunity for guests to get valuable insights into the latest solutions that are impacting positively the corporate world, especially those of Broadcom. The latter - distributed by Elytis in various territories of our network - is a global technology leader that designs, develops and supplies a broad range of semiconductor, enterprise software and security solutions. MBCOM is the sole representative of Broadcom Software in Middle East, Turkey, Africa, Eastern Europe and CIS.

The MBCOM Regional Summit 2024's programme included an award ceremony where partners received a shield for their excellent work, and a sundowner cocktail followed by a gala dinner.

Award Winners

Stor Systems Ltd: Valued Partner - Indian Ocean Islands

PCNET Pty Ltd: Valued Partner - Central Africa

Reemag Technologies Co. Ltd: Valued Partner - Small & Medium Business

System Plus Pioneer Ltd: Valued Partner - Small & Medium Business

State Informatics Ltd: Valued Partner - Small & Medium Business

Anoushka Rugjee: In recognition of excellent sales performance and enthusiasm

Island fun to celebrate one more quarterly result

To acknowledge the achievement of the latest quarter results and boost our motivation even further, Elytis planned an exciting day out on Ile aux Cerfs, a lush islet in the lagoon off the eastern coast of Mauritius, with pristine beaches and turquoise water. The 27th of January was D-Day for that outing, starting with sailing off the coast for a short trip to reach the pier of Ile aux Cerfs where catamarans and speedboats all moor.

Off the boat, our thirty team members were greeted with a welcome cocktail and enjoyed various fun activities on the beach and inland. Lunch was another great occasion for fellowship and team building, in that special atmosphere of the tropical islet in the light eastern sea breeze. Elytis is pursuing on its dynamic trend of growing its portfolio of brands and building up a team that delivers the right and timely service to our stakeholders. Rewarding the efforts and motivating the personnel to keep the tailwind blowing is key to our success.

Enjoying to the max!

Starting the financial year with a bottom line that goes beyond expectations for Q1 is matter for celebration. Elytis' management invited our staff to enjoy some fun time at Gravity Max, a lively leisure venue in the Tribeca Mall in Mauritius. On 12 October last, about thirty of our team members shared thrilling moments as well as fellowship during some adrenaline-packed and fun activities, and a dinner that followed.

The most exhilarating moment was no doubt the race in e-karts that made some of the reveal their competition driving skills. The boost in adrenaline was as much a reward as was the sense of togetherness that emerged from the time spent on and around the track that winds over two levels of the mall. A softer but as fun-packed ambiance made the ensuing karaoke session a real hit with all participants, and revealed some unknown talents! There was no better way to conclude that celebration than to share a nice dinner.

That event was moreover an opportunity to strengthen the team spirit within our team - a spirit that Elytis cherishes and that participates in our success.

New Recruits

Bhavisha Ramkalawon - Operations Assistant. The "inbound" team has some new help with handling stakeholders' accounts and information processing thanks to Bhavisha; credit notes, software orders and POs are some of the documents she deals with.

Ritesh Cahanoo - Pre-Sales Executive. Ritesh has recently joined Elytis to provide assistance for the Symantec and Veritas range of products. He supports with technical issues as well as implementation for these cybersecurity and data management tools.

Sharone Lafleur - Administrative Assistant. Sharone assists our Senior Executive Secretary, and is a key contact for employees as well as visitors and partners, as she handles personnel attendance, purchase order requests, contractors emails and visitors welcome.

Jeremy Perrine - Messenger/Driver. Jeremy is our new man for timely delivery of special packages, documents and letters at our partners' and clients' locations.

Team members reach new milestones for service

From left to right: Taymullah Boodhee, Fabrice Groeme, Thierry Geffroy, Anirow Ramma, Karishma Ramchurn, Saroja Ramsamy, Onaelle Mootoosamy

Congratulations and a massive "Thank you!", to our colleagues who have reached ten years or fifteen years of rewarding career at Elytis recently.

15 years at Elytis

Saroja Ramsamy has contributed for 15 years now to the efficient work of our accounting department. In her position as Senior Accounts Clerk and cashier, she is a key member of the team.

10 years at Elytis

Fabrice Groeme - An Accounts Supervisor, Fabrice is known by his colleagues and by stakeholders outside the company for his efficiency; but also by some of them for his long-standing

passion for motor racing and his driving skills in rallye races.

Karishma Ramchurn - A team member with the right skills for coordinating and making things happen in her position as Operations Officer, Karishma has contributed in building the Elytis' mark for quality of service.

Onaelle Mootoosamy - Onaelle is a Sales Manager for our Microsoft distributorship, with a track record in supporting that partner's presence in our territories. She has also had an elite career in table tennis and martial arts - the latter with support from Elytis.

Anirow Ramma - Anirow has been heading our Information Management &

Security business unit (promoting Broadcom and Veritas technologies) with unrelenting dedication and with inroads into new territories.

Thierry Geffroy - A colleague of Anirow, Thierry participates actively in matching our partners' and our client's needs in his position as Partner Account Manager for Broadcom and Veritas.

Taymullah Boodhee - Taymullah's role as Technical Supervisor in the After-Sales service of Elytis is instrumental for ensuring that clients get the satisfaction they need when entrusting us with performing a diagnosis and repairing their devices.

NEW TECH ALERT

Elytis adds the power of EcoFlow energy solutions to its portfolio

Elytis now adds to its portfolio a set of portable devices from EcoFlow, which pack energy storage capacity and temperature control solutions in compact and exquisitely designed appliances.

With 2.5 million users, presence in over 100 countries and regions, and 522 patented technologies, EcoFlow is an impressive industry leader despite having been founded in 2017 only. Such progress demonstrates the quality and attractiveness of its products, built on the strong will of the company's founders - battery engineers - to provide smart and eco-friendly solutions for individuals, families and society at large.

EcoFlow River2 and DELTA2 portable power stations

[Click for more information - River2](#)

[Click for more information - Delta2](#)

The River2 and the DELTA2 portable power stations from EcoFlow are the ideal solutions for individuals and families who revel in the outdoors - or have long days of work off grid. All of that in a compact and user-friendly package, with smart control thanks to the EcoFlow apps.

The River2 series provides power under 1kWh with fast charging speed, weight that's 30% lighter than the industry norm, as well as safe, stable use for up to ten years and 3,000 charge cycles. This is thanks to the LFP battery chemistry that is at its core. Lithium iron phosphate batteries (LiFePO₄ - or LFP batteries) use the most efficient technologies for portable power storage and are the solution adopted by leading electric car manufacturers for the best long-haul performance they can provide.

The River2's basic model weighs less than 4kgs but can provide endless hours of power to a plethora of devices; from the ubiquitous smartphones, tablets and laptops, to lamps, music players, barbecues and cameras. Longer days off the grid can be no issue with the optional solar panels for recharging the EcoFlow River2. With one of the most extended warranties in the industry, these power stations provide the peace of mind users need to enjoy fully the time they want for leisure or work outdoors for endless hours or for days, or for being able to continue to charge and use digital devices at home in case of long power shortages.

The DELTA2 range puts the bar even higher. It provides all the advantages of the River2 - portability, fast charging speed, LFP battery, warranty, app - but with even more punch on the capacity side! With its 1-3kWh expandable energy storage, the DELTA2 is the ideal solution for longer journeys and stays off the grid and for ensuring continuity in leisure and work activities at home during extended blackouts. It's home power security guaranteed thanks to it... While being portable and handy, it can even keep refrigerators, hotplates and other power-hungry kitchen appliances running for long periods thanks to a large output of 1800W. Moreover, the plethora of ports of the DELTA2 power station can handle up to 15 devices at the same time.

EcoFlow WAVE2 portable air conditioner

The EcoFlow WAVE2 is a Swiss knife of air temperature control. In a portable format, it packs huge power and sports a tailor-made EcoFlow compressor, both enabling it to provide 5100 BTUs of cooling and 6100 BTUs of heating. It is the world's first wireless portable AC with heater, and provides up to 8 hours of comfort, be it at home, in a tent or in a stationary vehicle with its engine powered off. Charging is super-easy thanks to the different sources that the EcoFlow WAVE2 can connect to: home or office AC socket, EcoFlow solar panels, EcoFlow portable batteries - with 28% more efficiency than with other portable power stations - and motor vehicle socket.

Running its high-tech compressor, the WAVE2 barely reaches the 45 decibel mark of sound output in sleep mode; that's the level in a library or for bird calls. Using it at home when it's cold or hot is hence not a tradeoff between temperature control and noise discomfort.

Make the most of “work from home” with Belkin

Belkin's technology helps people to be their best, anywhere they are; whether they are working from home, online learning, or homeschooling the little ones. Here are three Belkin accessories for enjoying the right mix of convenience and efficiency.

iPhone Mount with MagSafe

Work from home with never ever a conference call? No way! To make things easier for those ubiquitous online meetings, Belkin provides the iPhone Mount with MagSafe. Thanks to that beautifully designed magnetic mount, the iPhone's camera can be used to the fullest and with no risk of being cut off from the call because power is too short. It's the perfect compliment for a Mac Notebook and iPhone set up.

BoostCharge™ Pro

Attractive design and practicality merge in the 3-in-1 Wireless Charger Stand with MagSafe. That all-rounder of chargers can power an iPhone, AirPods, and an Apple Watch at the same time, each device on its dedicated charging pod. That's the seamless experience of official MagSafe technology and optimal speed combined in an enticing package.

Pro Thunderbolt 4 Dock

A workhorse for multi-device connection, making it possible to unlock the full potential of the home workstation... The Pro Thunderbolt 4 Dock from Belkin keeps users synced up with multiple devices, 4K displays, and up to 90W of power delivery. It is packed with the latest in Thunderbolt technology and offers 12 convenient ports to make the most of the multitasking capacities of the Mac.
